

High Power Sanitising Tablets

CLEENOL

EST. 1948

Effervescent
disinfectant
tablets for ease
of dosing.

Effective against
non-enveloped
viruses in 5
minutes.

DEFRA Approved for
Foot & Mouth Disease,
Swine Vesicular
Disease, Diseases of
Poultry, TB, and
General Orders.

6 x 200 | 0625CHL/6

Chlorine based disinfectant tablets, providing a safer and more convenient option to traditional sodium hypochlorite bleach. Can be used to sanitise a wide range of non-porous hard surfaces such as food preparation areas, drains and sinks. It can also be used as a salad and vegetable wash.

Avoid contact with acids as this may product chlorine gas.

Directions for use

For professional use only.

For general surface disinfection:

1. Ensure that the surface is clean and free of debris before application.
2. Dissolve 1 tablet per litre of cold water to give a working concentration of 1000ppm of chlorine. *Alternative use patterns and dilution rates can be found in the table below.*
3. Apply to surface to be cleaned via mopping, spraying or by wiping, paying particular attention to corners and under edges. Regularly refresh the solution every 3-4 hours to ensure that the level of chlorine remains high.
4. Leave for up to 15 minutes, before rinsing with clean fresh water.

Areas to be Cleaned	Solution Strength Required	No. of Tablets	Volume of Water	Contact Time
Mops, dishcloths, etc	60 ppm	1	17L	60 minutes
Food preparation surfaces/ processing equipment	200 ppm	1	5L	3 minutes
Drains, sinks, toilets, etc.	400ppm	2	5L	15 minutes
General Disinfection	1000 ppm	1	1L	15 minutes
Blood Spillages	10000 ppm	10	1L	2 minutes

Product Info

Colour: **White**

Fragrance: **Chlorine**

pH (1% Solution): **5 – 6.5**

Shelf Life: **24 Months**

For use as a vegetable or salad wash (to be consumed within 24hrs of washing):

1. Remove any visible dirt and debris from the salad, fruits or vegetables with clean, fresh drinking water.
2. Dilute 1 tablet per 10L potable water (giving a solution of 100 ppm chlorine).
3. Immerse the items to be cleaned, agitating to remove any excess air bubbles.
4. Leave to soak for at least 5 minutes.
5. Rinse with fresh, clean drinking water to remove excess solution.
6. Consume as soon as possible within 24 hrs.

For use as a DEFRA Disinfectant:

1. Ensure that the surface is clean and free of debris before application.
2. Dilute in cold water depending on the order required as per the table below:

DEFRA Approved Dilution	1g in	One 3.25g tablet in
Foot & Mouth Disease	424 ml	1378ml
Swine Vesicular Disease	317ml	1038ml
Diseases of Poultry	350ml	1138ml
General Orders	360ml	1170ml
TB	12ml	39ml

3. Apply to the surface to be cleaned, via mopping, spraying or wiping, paying particular attention to corners and under edges. Regularly refresh the cleaning solution to ensure the chlorine levels remain high.
4. Allow to air dry.
